NOTES

- (1) Minimum age at which a visitor may drive a car.
- (2) UK driving licences which do not incorporate photograph are recognised but, drivers must be able to produce photographic proof of identity (e.g. passport).
- (3) All valid UK licences should be accepted. However, the acceptance of the older 'all green' style UK licences cannot be guaranteed. Drivers may wish to voluntarily update them before travelling abroad, if time permits. Alternatively, older licences may be accompanied by an IDP.
- (4) Before taking a vehicle abroad contact your motor insurer or broker to notify them of your intentions, and ask their advice. It is important to know what level of cover you will have and what documents you need to prove it.
- (5) GB Stickers are compulsory within the EU unless your UK registration plates display the GB Euro-symbol (Europlates) which became a legal option from 21 March 2001. The Euro plate must comply with the new British Standard (BS AU 145d). The Euro plate is only legally recognised in the EU; it is still a requirement to display a GB sticker when travelling outside the EU.
- (6) Not required for two-wheeled vehicles. In **France** from the 1st January 2013, all drivers and passengers of a motorcycle over 125cc or a motor tricycle over 15 KW/h must wear reflective clothing while riding their vehicle.
- (7) Although not compulsory for visiting motorists to carry a warning triangle, its use is compulsory in an accident/breakdown situation.
- (8) **Spain:** One warning triangle compulsory for non-Spanish registered vehicles; two for Spanish registered vehicles. Note: Drivers of non-Spanish registered vehicles should consider carrying two triangles as, regardless of regulations, local officials may impose an on-the-spot fine if only one is available.
Croatia: Two triangles compulsory for vehicles towing a trailer. **Switzerland:** Warning triangle must be kept within easy reach (not in the boot).
- (9) The use of hazard warning lights or a warning triangle is compulsory in an accident/breakdown situation. However, a warning triangle should always be carried as hazard-warning lights have no effect at bends or rises in the road, or may become damaged or inoperative.
- (10) Compulsory for vehicles with an unladen weight exceeding 1524kgs
- (11) Wearing, compulsory if driver and/or passenger(s) exits vehicle immobilised on carriageway, in **Italy** at night or in poor visibility, in **Spain** on all motorways and busy roads. In **Croatia** the wearing is compulsory whenever you have to get out of the vehicle at the roadside in an emergency. In **Portugal** and **Norway** the actual law applies to residents; however, regardless of the regulations local officials may impose an on-the-spot fine. In **Belgium** the wearing of the reflective jacket only applies to the driver, it must be worn should you be stranded on a Belgian motorway or on a major road or should you stop at a place where parking is not allowed. In **France** drivers must have one warning triangle and one reflective jacket in their vehicle. In **Austria** the regulation applies only to the driver.
- (12) The legal requirement is to 'not dazzle oncoming drivers' rather than specifically to adjust/convert the headlamp beam pattern. Without adjustment the dipped beam will dazzle oncoming drivers and this could result in a fine. Headlamp beam converter kits are widely available but may not be suitable for all types of headlights. The AA shop sell beam converters suitable for all vehicles and individual fitting diagrams are included for the latest 'clear glass', 'projector and xenon' headlights inside the packaging. In some countries it is compulsory to use dipped headlights at all times when driving during the day. Note: this adjustment is not required for two wheeled vehicles as the beam pattern is more symmetrical but check that any extra loading has not affected the beam height. On some cars it is inadvisable or impossible for anyone other than a qualified technician to change a headlamp bulb unit e.g. high intensity discharge (HID) headlights and carrying spares is not an option. However, it is recommended that spare bulbs are carried for any lights that may be easily and/or safely replaced by the owner/driver. Spare bulbs are compulsory for Croatia.
- (13) **Sweden:** Police are not authorised to actually collect fines, which must be paid in accordance with notice instructions.
Italy: Police will collect a quarter of the maximum fine amount from drivers of foreign registered vehicles. **Ireland:** Police are not authorised to actually collect fines, they will issue a notice which must be paid within 28 days. **Croatia:** The fine does not have to be paid on the spot; however it does need to be paid within 8 days. **Portugal:** Some traffic police carry ATMs
- (14) **Portugal:** Visiting drivers of 17 years of age may encounter problems even though they hold a valid driving licence in the UK.
- (15) Outside built up areas, during snow or rain causing poor visibility.
- (16) Compulsory during daylight hours if the visibility is poor. For France the use of dipped headlights are recommended throughout the year, for **Croatia** during daylight hours from the last Sunday in October to the last Sunday in March.
- (17) Recommended as their carriage is compulsory for vehicles registered in that country.

Compulsory equipment

- (18) Many countries now stipulate that GPS based navigation systems which have maps indicating the location of fixed speed cameras must have the 'fixed speed camera PoI (Point of interest)' function deactivated.
- (19) In order to use some Motorways in Portugal, a temporary electronic toll device (DEM) or the pre-payment of tolls is required.
- (20) Recommended for two wheeled vehicles
